SECURE • ENHANCE • PROTECT

Domestic Product Range – Quality & Value Guaranteed

This brochure is designed to show the range of our products which we believe are especially suitable for the residential and domestic markets. Our reputation as the leading Irish Company involved in the installation and supply of fences gates and railings, is founded on our manufacturing and installation experience since 1973 in servicing the needs of industrial and educational users, large construction projects and diplomatic clients. www.irishfencing.com offers comprehensive information and advice on our products and services.

- We do not offer lower quality for domestic contracts, we operate our entire business to the standards demanded by leading architects, contractors, business and educational clients.
- We offer you full assurance for the quality of our products, certification is available where required, and we are CIRI Registered, Members of Guaranteed Irish since its inception in the 1980s, fully insured and tax compliant.
- Where required by legislation our gate installations are carried out by fully qualified DHF trained and Private Security Authority (PSA) Registered installers.
- Under The Home Renovation Incentive the works and services we provide are eligible for a tax refund. We can provide assistance in making your claim.

For more information or to see our full range visit www.irishfencing.com or call 01 626 8363

GATES & AUTOMATION

Safety and Legal requirements for automated gates

Since 2008 it is a requirement that automated gates comply with The European Machinery Regulation 2008 SI 407 this regulation has Manufacturing, Installation and Safety requirements. It is also a requirement that all persons installing gates over 1500mm high in The Republic of Ireland are registered with The Private Security Authority (PSA).

Additionally all our installations are carried out by personnel registered and trained by the DHF Powered Gate Group, an industry body whose function is to raise quality and safety standards in the design, manufacture, installation and maintenance of powered gates.

All member companies within the group are bound by a Code of Practice and work to exacting technical standards. This ensures that every gate supplied, installed or maintained by a DHF member company complies with all current safety legislation and safety standards.

Entrance Gates & Side Gates

Entrance gates and side gates can be supplied with Steel or Timber infills if you wish to get a price for a gate we suggest you first take the measurement of the opening you require tell us whether it will be fixed to a wall or require posts and any special requirements a photo of the area will really help provide the right answer.

All of Our Gates can be Electronically Automated or be Fitted with Manual or Hydraulic Closers.

The technology and the construction we used to provide the entrance gates to The U.S. British, Russian and many other Diplomatic clients is the same as we will use in providing an entrance gate to your home.

An automated gate can provide you with comfort convenience and safety.

- No more getting out of the car in the rain to open and shut a gate.
- No more parking on a restricted roadway in traffic to open or close your gate.
- No more leaving the gate open all day because you can't get back to close it.
- Your children and animals can be left in safety behind a closed gate.
- The value and appearance of your property is enhanced by Automated Gates.
- Safety and security are increased by your ability to control who enters your property from the comfort of the inside of your home.

How Do You Operate Your Gate

Gates can be remotely controlled by radio transmitters GSM systems from your mobile phone, card readers, digipads or fobs.

- We can explain the positives and negatives of each system. The operation of the gate can be controlled to suit your needs for example they can be programmed to close automatically behind you or can close with the push of a button.

Operating Equipment

As an independent supplier we can select the best products for your gate we have relationships dating back over 40 years with a number of prestigious manufacturers of gate automation.

Generally there are 3 main types of gate operations Swing, which can have below ground motors or motors mounted on the gate. Sliding and Cantilever Gates use rack and pinion motors

A new and very useful design is a Cantilever Gate this functions like a sliding gate but has no track meaning your driveway does not have to be disturbed you will not need to close off access for a long period whilst the gate is being installed and if your entrance area is not level you can avoid major building work.

We have a specialised brochure on Automated Gates and if you ring any of our offices you will find someone knowledgeable to assist you.

Irfen® Gate Closer

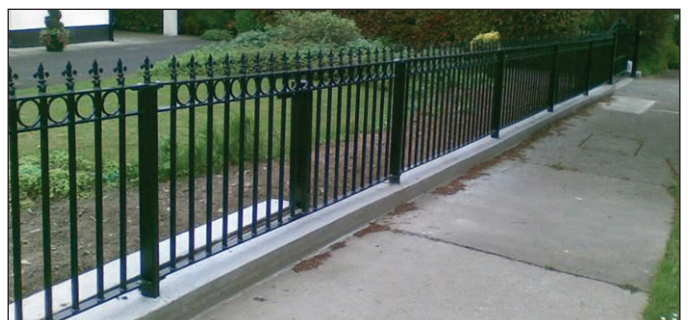

The Irfen® Gate Closer. Is a hydraulic unit which can be utilised on a new gate or retrofitted to an existing gate. This closer ensures that your gate always closes behind you it will deter undesirables who might wish to slip in, and protect your animals and children. Combined with an Electronic Mag Lock it can ensure a locked barrier for your safety.

RAILINGS

Railings Adding Attractive Security and Prestige to Your Home.

Will a railing suit your home, will a railing provide the security you need to protect your home and family. We have a tradition dating back over 40 years of providing railings to some of the most prestigious properties in Ireland we have the largest range of standard designs and we are happy to follow your own design ideas. Our skilled tradesman can produce a railing which will add a quality perimeter to your property, using the latest top quality materials and finishes. Our prices for domestic clients will be competitive because of the savings we make on the quantities of railings we are producing for our Educational and Industrial clients. You benefit from our buying power and the demanding standards demanded by those clients

PERIMETER MESH SYSTEMS

If you require a perimeter fence our Mesh Systems offer a highly competitive and practical solution. As one of the largest providers of Mesh Products we can bring our knowledge and installation expertise to the private property owner to give you a competitive and professionally installed fence. You can also buy the materials from us for self-installation, including bagged ready mixed concrete!

The most popular mesh system in our range is Kylemore, a fence very suitable for use as a domestic perimeter, it has an aperture of 200 x 50mm giving good visibility and is made from Zinc and Polyester coated 5mm wire welded at each joint. We can also offer heavier meshes where you have special requirements.

Any of our 3 offices can provide the technical information for you to select the right material for your needs. Or visit our website www.irishfencing.com

Dog Runs and Cages

Do you have a dog who you would like to keep in their own area. We have a range of standard Dog Runs which we can supply only or supply and install at very competitive prices. Using our Kylemore Mesh with specially designed gates 1000mm wide. The mesh panels are 1200mm or 1800mm. high by 3000mm. Wide. The dog run comes with base plated posts for fixing to concrete surface or extended posts to be concreted in. Available Galvanised and Colour Powder Coated (Plasgalv®) finish green RAL 6005

Contact our Dublin, Cork or Northern Ireland offices for advice on nonstandard designs. If you send us a sketch of your layout we can quickly get you a price by return.

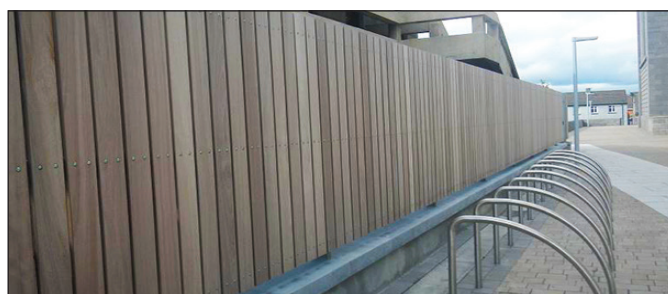

TIMBER PRODUCTS

Standard Fencing Panels

We have an extensive range of popular designs of board and shiplap fencing at highly competitive prices. These we classify as our standard timber fencing range and these can be best seen on our website www.irishfencing.com

Bespoke Quality Timber Fencing

We can also offer top of the range hardwood designs in Iroko (Teak) Sapele (Mahogany) and Accoya (which comes with a 60 year guarantee.) These timbers and the fences they form provide a quality addition to your property. Your architect will provide advice on appropriate material and design or you can contact our staff. We recommend the use of galvanised or galvanised and polyester powder coating steelwork posts and frames to ensure a long life for your investment.

For more information or to see our full range visit www.irishfencing.com or call 01 626 8363

WALL TOPPINGS

Wall Toppings and Security

Most enquiries we receive for security products involve ways of preventing intrusion over existing walls or fences. We have a wide range of choices which can be seen on a video on our website. We can adapt most of our Mesh, Palisade or Railings for wall fixing, they can fit directly if the wall is suitable or be fixed independently using posts concreted in or base plated. All situations require individual solutions and as a first step send us a photo and any information re lengths height access etc. use our Enquire now form on our website, or email info@irishfencing.com.

We will be happy to survey your site if we can see a solution to your problem. Razor Wire or Barbed Tape are highly effective but do not look well in many domestic locations, but have their place in certain situations. We have a wide range of revolving fences, watch the video to see if it suitable option for your problem.

One product that very much lends itself to self-installation and provides a highly effective deterrent is Wallspike. It comes in manageable 1800mm (6ft) Lengths of pressed zinc coated steel with pre punched holes for fixing. We can also apply a Polyester Powder Coated finish to give a coloured finish.

We can also supply all fixings you might need for most types of walls.

Advice on Usage of Wall Toppings

By law a property owner or manager must prevent intrusion to any area or equipment where a person can be injured. Also by law an innocent or unsuspecting person cannot be injured by a deterrent which they contact accidentally or unexpectedly it is also highly illegal to place a danger where an intruder is lured into injuring himself (entrapment).

How does one reconcile these two legal positions?

Firstly any of these products must be installed in a clear and obvious position. They should be fixed in a position where a casual passer-by cannot come in contact with them. As a general rule we believe that any deterrent placed in a clear and obvious position at a height of at least 2100mm above ground will be fully legally compliant. We would also recommend that, appropriate signs highlighting the deterrents presence and nature should be fixed. We can provide appropriate signage.

KEE KLAMP

Kee® Klamp for DIY Fabrication of Steel Tube Items.

Need to fabricate some racking shelving, a railing maybe, need to provide a handrail for a disabled person? Our Kee Klamp range of fittings enable the construction of these and many other items from steel tube using only an Allen key to assemble.

Welding is not needed!

View the extensive range of informational videos on our website design your structure and we can provide the steel tubing cut to size and the necessary Kee Klamp fittings. View the relevant pages of our website but use the Enquire Now facility. Outline your project and we will provide a quotation or arrange a call back from one of our experienced advisors.

Irish Fencing Services

SECURE • ENHANCE • PROTECT

Over 50 Years Experience – Quality Assured

Over the years we have gained huge experience in the supply and installation of fencing, railings and gates to the industrial, educational, diplomatic and utility areas. We have the widest range of products in the market and we provide the same high standards of service to all our clients, big or small.

Within the residential and domestic areas there are installations in all areas which we can point you to if you wish to speak to a satisfied client. By using only top quality materials and the most highly skilled installation crews, our projects turn out successfully, providing products designed to last.

- Our contracts staff can work with your concept adding our knowledge to your needs, to give the perfect solution at cost effective rates.
- Our Gate installation crews are PSA (Private Security

Authority) and DHF Registered, and will comply with Health and Safety requirements and best practice.

- We are unlikely to be the cheapest supplier you will Google, but we believe that on examination we offer a superior package that offers excellent value for your investment and meeting full safety requirements.
- We offer you full assurance for the quality of our products, certification is available where required, we are CIRI Registered, Members of Guaranteed Irish since its inception in the 1980s, fully insured and tax compliant, but more importantly we have been Irelands leading fence and gate company since 1973 giving you the reassurance that we are flexible, reliable, innovative and firmly embedded as the leaders in gate manufacture in Ireland.
