Railing Product Ranges – Guaranteed Quality

This brochure is designed to give an overview of the wide range of different Railing products we can offer to the specifier or end user. Further information specifications, product photos, drawings etc. can be seen on our website www.irishfencing.com.

- All steel work is hot dipped galvanised to BS EN9 ISO 1461:2009 after fabrication and if required subsequently electrostatically powder coated in a plant complying with E.N. 1722 part 16. (Plasgalv®).
- As standard and to comply with building regulations all our railings were required have 100mm gaps between bars.

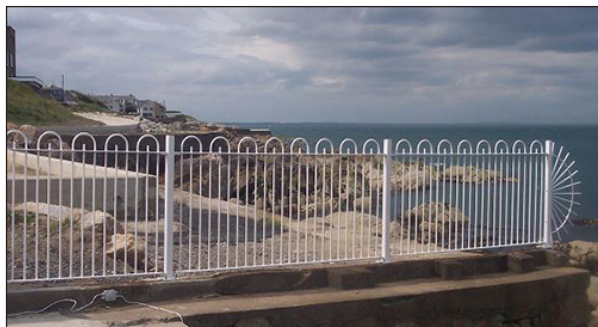

Standard Railings

Standard Railings from Irish Fencing Services have punched flat top rails and punched or plain bottom rails. The infill is usually round solid bars though square solid is sometimes used. The top of the bars are plain or turned to a point. The panels are supported on Steel box section, round tube or RSJ. Posts. By using the dimensions and panel lengths as shown on our drawings you will obtain the most cost competitive price.

Nonstandard designs or lengths are easily accommodated by our skilled tradesmen.

For more information or to see our full range visit www.irishfencing.com or call 01 626 8363

Bow Railings

Bow Railings from Irish Fencing Services come in four standard formations Bar in Bow, Bow and Bar, Interlaced Bow and Plain Bow.

The basic structure is as for all standard railings, flat top rails and punched or plain bottom rails. The panels are supported on Steel box section, round tube or RSJ. Posts.

Reference to Health and Safety Standards and Euro Design standards for playgrounds should be checked when designing for areas with children.

We have a specific product Playspec that addresses this requirement.

System Railings

Exclusive to Irish Fencing Services our System Railings Range includes Munster, Leinster, and Connaught designs, as well as Roundex and Diamex these designs offer square, round, and between square and round infill with attractive pressed heads. Rails are specially rolled sections and uprights are Structural Hollow Sections, panel sizes are standard and heights up to 2400mm can be offered. These systemised products are designed to offer a highly competitive price with an attractive range of designs.

Estate and Park Railings

Kenmare, Killarney and Kanturk designs

Using the designs common to the Big House of the Regency and Georgian Period, The Estate Railings Range use flat sections with slender dimensions to act as a discreet decorative boundary, to present the house or park in as open a perspective as possible, uncluttered, yet controlling animals and defining the line between formal garden and less formal area. Some of these ranges are available in flat pack design for DIY installation

For the urban park or landscape project we also have a number of modern products used by many of the Irelands largest Parks Departments.

Custom Railings

These products use the skill of our fully qualified trades people to convert your design into an exclusive railing for your project. Examples of this would include The British Embassy Ballsbridge, Intel Leixlip, Worldport Blanchardstown, Park Developments St Anne's Milltown, Ongar Stud and developments for Ireland's largest house builders and developers.

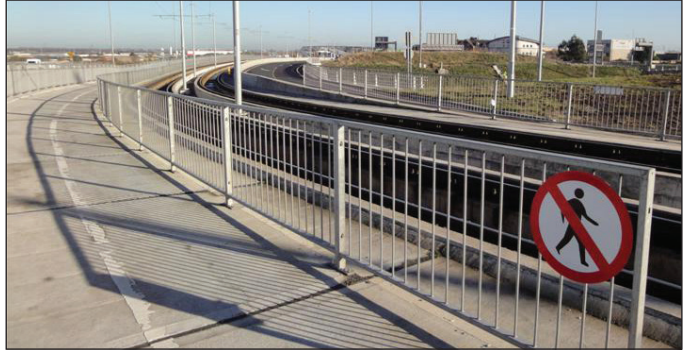

Decorative Railings

Using the same basic structure as our Standard Railings, Decorative Railings utilise casting such as Heads, Finials, Bosses, Collars and Rings etc. Looking back to the Georgian and Victorian eras, when the wealthy classes began to mark their homes with ornate railings, the use of these embellishments transforms a railing and enhances the property it fronts.

Pedestrian Barriers and Guardrail

Performing a lifesaving function the Irish Fencing Services range of pedestrian railings and barriers are made to designs tested and approved in the most rigorous conditions. These are practical robust products to which we bring our ability to make specials and meet the specific site requirements, with our qualified installation crews. Generally because of their practical nature these products are presented in a Galvanised Finish. Plasgalv®, is used where appearance is of major importance.

Handrails & Kee Klamp® Safety Barriers

We can manufacture Handrails, Stair Rails etc. from your designs.

We can also utilise certified products from Kee® Safety Ltd for whom we are the Irish agents, enabling us to manufacture and site assemble barriers and railings using Kee® Klamp fittings.

Railings For Use For People With Disability

Kee Access® is a range of fittings from Kee Safety Ltd which comply with the requirements of Part M. of The Irish Building Regulations and The UK DDA requirements enabling the construction of compliant handrails where they are required to assist our disabled citizens.

Gates

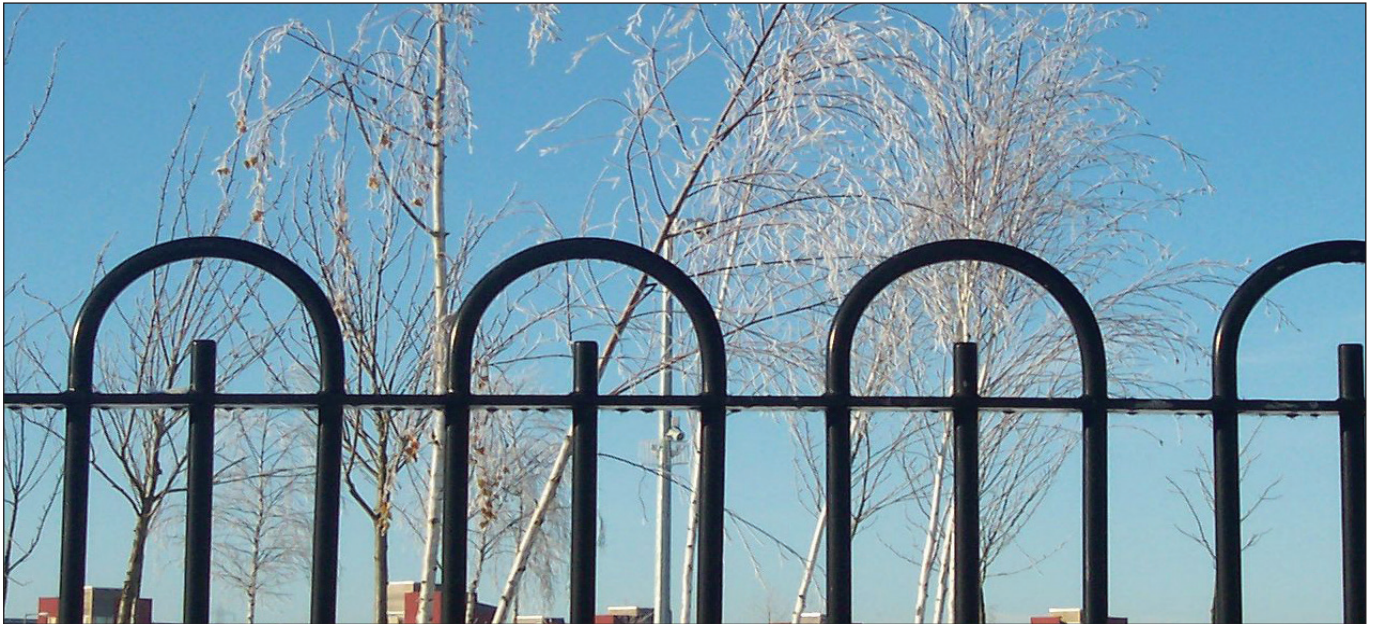

To complete your project we can provide gates either Swing Sliding or Cantilever to match any of our railings and these can be automated if required.

We have a separate brochure on gates, and this is available together with full product details on our website on www.irishfencing.com our Installation crews are fully Qualified and PSA registered.

Irish Fencing Services

Over 50 Years Experience – Quality Assured

Our Experience in the supply and Installation of railings extends from small installations to enhance a residential property, to recent contracts including The Restoration of St Mel's Cathedral (The winner of The Royal Institute of the Architects of Ireland (RIAI) 2015 People's Choice Award). We have also just completed railings at Hueston Quarter for Collen Construction. Housing developments at Phoenix Park Racecourse for Flynn and O'Flaherty and at Saggart for Anthony Neville Homes. Railings at road realignments at ALSAA Dublin Airport Rd for Jons Civil Engineering and new railings at The Peoples Park Bray for the same contractors. BAM contractors used our PG2 Pedestrian barriers at The Newlands Cross interchange and John Sisk & Sons Ltd used our Kee Klamp installations at Guinness Dublin.

In the past we have installed Railings to The U.S. British French, Russian, Egyptian and many other Diplomatic and Consular buildings and Ambassadorial residences. We have supplied and installed Railings to the SME sector as well as The ESB, Bord Gais, CIE Local Authorities in The Republic and Northern Ireland to Multi National clients such as Microsoft, Google, Facebook, IBM, Pfizer PayPal, EMC

and many more, as well as Schools and Educational facilities in all parts of Ireland and abroad.

- By using only top quality materials and the most highly skilled installation crews, our projects turn out successfully, providing railings of taste designed to last.
- Our contracts staff can work with your concept adding our knowledge to your needs, to give the perfect solution at cost effective rates.
- With our 3 locations we are close to your project for a site visit or survey.

We offer you full assurance for the quality of our products, certification is available where required, and we are CIRI Registered, Members of Guaranteed Irish since its inception in the 1980s, fully insured and tax compliant. More importantly we have been Irelands leading railing manufactures since 1973 giving you the reassurance that we are flexible, reliable, innovative and firmly embedded in the culture of railing manufacture in Ireland
