Sports & Recreation Products

This brochure gives a simplified overview of our products for sports and recreational use. More detailed photos, drawings in pdf and CAD format, specifications and Q.40s are available on www.irishfencing.com if you require further assistance or any further information contact any of our offices located in Dublin, Cork, and Newry.

- We provide the widest range of perimeter protection products for the sports and recreation markets. These include specially designed mesh systems for all sports including GAA, Soccer, Rugby, Hockey, Basketball, Cricket, Baseball, Golf, Tennis, Track surrounds and Shot and Discus cages.
- We can enhance your playing experience, protect your players and spectators, ensure compliance with health and safety requirements and using our Kee Klamp® range of flexible handrail and barrier solutions ensure that handrails and barriers used in sports facilities are suitable for use by our disabled citizens.
- We have a special expertise in the provision of protective netting, engineer certified at heights up to 20,000mm, as well as manufacturing dugouts for side-line use and the design and installation of fully fitted stands.
- Sports Mesh Fences are manufactured from Zinc Protected Core wires and finished with Polyester Powder coating in a range of colours. All steel Work is hot dipped galvanised to BS EN9 ISO 1461:1999 after fabrication or subsequently electrostatically powder coated in a plant complying with E.N. 1722 part 16. (Plasgalv®)

Kinsale Sports Standard & Rebound 868 the Perfect Fence for Large Ball Sports

Kinsale and Kinsale Rebound Twin Wire 868 mesh gives you and your team the ultimate playing experience enabling the use of the perimeter fence as part of the game. Rebound ensures that the bounce of the ball off the fence is accurate and true. Kinsale is constructed using a 6mm vertical wire and twin 8mm horizontal wire, one to the front and one to the back (868) this results in a very strong and rigid flat mesh fence. The aperture of the mesh is 200mm x 50mm providing a solid perimeter for all ball sports. In the Rebound option the lower 1200mm of sports mesh panels has a reduced aperture to give a controlled rebound. Kinsale rebound comes in heights 2000mm, 3000mm, 4000mm 5000mm & 6000mm as standard. This is also available in 656 design which whilst obviously lighter is appropriate in applications where continuous use is not planned.

Kinsale Combo Standard & Rebound 868 Have all the Benefits of a Solid Fence with Netting Above.

Using our Kinsale Standard or Rebound 868 Twinwire Mesh at the lower level you can use an extension of Irfen™ sports netting of 2000mm increase the height of the fence in our Combo design. The use of netting instead of Kinsale mesh for some of the required height can give significant cost savings in appropriate locations. The most popular design is 3000mm high Standard or Rebound Mesh with 2000 or 3000mm of Irfen® netting above. Also available as 656 configuration.

Irfen® Netting

Our Netting is supplied Custom made to the necessary size using 2/10/48 Polysteel woven twine 2.5mm diameter. The mesh is customised and each section is reinforced with 8mm Polysteel rope edging. The aperture of the netting is varied to suit the size of ball involved.

Posts are circular hollow section and are specifically designed based on height, usage and site conditions. Typically post centres are 7500mm Back struts and cross braces are incorporated where required by height and site conditions.

Foundations are designed for each installation. Nets are provided suitable for small ball sports such as Golf, Cricket, Baseball, Hockey, Hurling etc. And Large ball Sports Soccer, Rugby, and Gaelic Football.

Ballstop Sports Netting is available in heights up to 20000mm high. We have standard designs available up to 12000mm. Above 12000mm we will design or work with your design team to design a system appropriate to your site conditions and wind loadings.

Irfen® Roof Netting

Using the same Polypropylene Polysteel Netting as our Ballstop Systems with specially designed bracing and supports Roof netting is used to cover Sports Pitches to contain stray balls it is used for practice areas to retain the ball.

It is also used in open shopping areas to prevent theft by throwing goods over a fence or wall.

This product requires technical advice which we are pleased to provide and it can be obtained from our offices In Dublin, Cork and Newry.

Irfen® Divide netting

Sport Divide netting Systems are a unique way to split your synthetic pitch development for maximum use. Our system includes its own enclosure that allows the netting to be pulled back and outside of the pitch.

Protecting and Separating Spectators from Players and Providing Safe Access

Irfen® Specterail Sports

Specterail Sports provides a safe barrier to allow spectators to view sports activities in comfort and safety. The spectator is provided with a support to lean on and injury from stray balls or contact with players is provided to waist height with an enhanced mesh protection. Kinsale Twin Wire 868 mesh.

Kee Klamp®

Utilising certified Kee Klamp® Fittings we can design handrails and protection structures for lighting columns and other risk areas. For disability access we offer the fully approved.

Kee Access®

A range of components from the manufacturers of the world famous Kee Klamp® fittings designed to provide Handrails and Barriers suitable for use by the disabled fully compliant with EU and British Standards and Part M of Building Regulations for Ireland requirements.

Additional Products to Enhance Your Playing Experience

Irfen® Sports Dugouts

Dugouts are designed to be an attractive addition to your synthetic or grass pitch development. All team shelter and sports dugouts frame work is fully galvanised and the shatterproof high grade poly carbonate has an anti-climb design. With high grade plastic seats or folding seat options. Dugouts are competitively priced and on speedy delivery contact our offices in Dublin Cork or Newry.

Irfen® Sports Stands

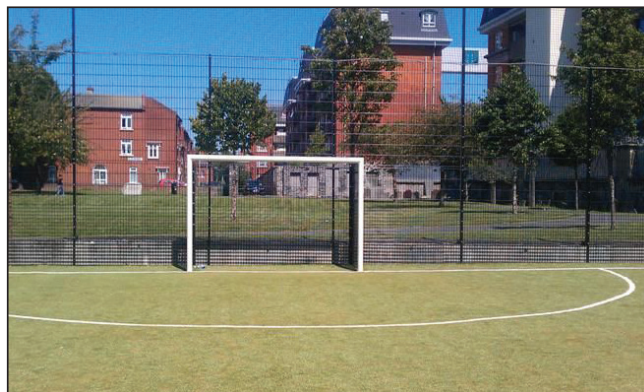

Contact us for the complete solution to all your pitch needs including specifically designed stands. The system is designed in a modular basis which can involve 4 or 6 rows of seats. Generally stands between 200 and 1500 spectators are appropriate with this design. We can offer design assistance and advice on this product.

Lighting Columns and Other Steel Structures

We can incorporate your lighting requirements into the structure of the court for example extending corner posts or designing specific posts these can all be finished in our Plasmagalv® finish.

Goals

Recessed Goals, and recessed cages which do not take from the playing area and can allow for the provision of facilities for Basketball are popular options but contact our office or check out our drawings on the website for other options.

Other Meshes

Kylemore 200x50mm

Our standard mesh which is widely used in sports recreational and domestic projects. It is our most competitively priced mesh product. In sports its main use is as a perimeter for play areas for younger children, it is not appropriate for heavy usage areas and we would not recommend it for use where over 12s may play.

Kilbarry

A more decorative product than Kylemore stronger and particularly useful where a pitch is separated by a margin from the fence in excess of 3 metres and where physical contact is not an issue.

Irfen® Chainlink Mesh

The perfect fence for Tennis absorbing the ball impact and preventing injury to players. It is a skilled job to install Chainlink and we pride ourselves on the skill of our installation crews in working with this product.

Irish Fencing Services

SECURE • ENHANCE • PROTECT
